PROFILE

As a PhD Candidate in Economics, I specialize in incomplete (partially identified) models, applying them to pressing economic issues such as labor market dynamics, including participation, transitions, and retirement. My approach often incorporates the analysis of subjective expectations data, both numerical and textual, focusing on identifying non-classical measurement errors such as rounding, bunching, and ambiguity.

EDUCATION

PhD in Economics , Université Laval, Department of Economics	Expected 2025
M.A in Statistics and Econometrics , Cheikh Anta Diop University of Dakar	2017
B.Sc in Economics , Cheikh Anta Diop University of Dakar	2015

RESEARCH INTERESTS

Behavioral and Experimental Economics, Labor Economics, Applied Econometrics, and Public Policy

WORKING PAPERS

The Measurement of Labor Market Expectations of Persons with Disabilities in Canada, with Charles Bellemare and Luc Bissonnette.

Returns to Government Investment in WAEMU: Between Optimality and Crowding-in, General Office of Planning and Economic Policy Review, Planning Paper 23, February 2018.

WORK IN PROGRESS

Using Machine Learning to Understand Subjective Expectations, through Semi-Structured Interviews
Job-search and matching with subjective expectations

Notes: From Social Security Reliance to Regular Jobs: The CIT Pathway for Persons with Disabilities
